

Quality Professional Footwear

"PROMPT DELIVERY"

# SUGGESTIONS FOR USE

**PAG** **HI-TECH**  
HI-TECH series shoes, thanks to their considerable comfort, are especially suited to every job where workers stand for long.  
**04/08**  
S1/S2 - food industry, supermarket chains, catering, etc.  
01/02 - hospitals, pharmaceuticals, services, laboratories, etc.  
S3 - building (house painters, drywallers), agrobusiness

**PAG** **PROFESSIONAL**  
PROFESSIONAL series shoes, thanks to their extremely elegant and refined look, are suited to jobs directly dealing with the public.  
**09**  
01 - HD RE.CA. - hostels, catering, etc.  
S1 - services, industries, warehouse, etc.

**PAG** **MADAM'S GRIPPES**  
MADAM'S GRIPPES series styles thanks to their considerable comfort, are ideal for every job where workers stand for long.  
**11/12**  
S1/S2 - food industry, supermarket chains, catering, etc.  
01/02 - hospitals, pharmaceuticals, services, laboratories, etc.

**PAG** **ESD-SHOES**  
ESD-SHOES, thanks to their high electrostatic dissipation, are suited to every high-tech job, a explosion risk zones and in presence of electronically controlled machines.  
**13/15**  
operating and intensive care rooms, chemical and electronic industry, white rooms, etc.

**PAG** **OP-CLOGS & TOP-KLOGS**  
OP-CLOGS, thanks to their considerable comfort and autoclave sterilizability at 135° C, are essential in every job requiring a very high hygiene standard.  
**16/20**  
hospitals, pharmaceuticals, laboratories, etc.

**PAG** **EURO-WHITES**  
EURO-WHITES boots are indispensable for job requiring constant contact with water and liquid substances such as vegetable oils, weak acids and animal fats.  
**21**  
food industry, supermarket chains, catering, etc.

**PAG** **ACCESSORIES**  
SAFE WAY accessories are produced of top quality materials and, applied to shoes, synergistically provide comfort and hygiene for the wearer's feet.  
**22/23**

**PAG** **WORK & LEISURE**  
The combination of comfort with synthetic foecap, refreshing alveolate insole and antibacterial lining makes the series WORK&LEISURE indispensable for anyone wearing the shoes for long.  
**24/31**  
01 - hospitals, services, laboratories, etc.  
S1/S2 - agrobusiness, large-scale retail trade, etc.  
S3 - building (house painters, drywallers), agrobusiness

# TECHNICAL

## HYGIENE

All Safe Way footwear is machine washable at 40° C. This makes it possible to consider a shoe as any cloth and plan periodical washing to achieve a high hygienic standard.

## COMFORT

The high porosity of materials used ensures excellent foot transpiration guaranteeing at the same time the right temperature and ventilation. The wide and fitting shape allows feet to maintain a natural position also during work, thereby avoiding every forcing and ensuring fatigue and pain. The unusual lightness of Safe Way footwear considerably reduces fatigue, especially in case of continuous use and working standing for long.

## TEXTFIBER MATERIALS LORISAFE

TEXTFIBER uppers, used for 01 and S1 footwear, are suited to any use requiring standard chemico-physical performances.

TEXTFIBER is the exceptional microporous material allowing the foot to breathe: the microporosity of the high density polyurethane layer guarantees breathability, while the natural cotton fabric embedded in large-cell polyurethane in contact with the foot guarantees good sweat absorption.

LORISAFE uppers, waterproof and breathable, used for 02 - S3 footwear, are indispensable in constant presence of liquids and where high chemico-physical characteristics are required.

LORISAFE is high-tech material derived from an amazing combination of microfibres, thinner even than a thousandth of the thickness of a silk thread, and polyurethane compounds.

LORISAFE is breathable, water-proof and keeps the right temperature, thereby ensuring maximum comfort even by large thermal excursions.

## MACHINE WASHABLE

All of the insoles are removable and, like the shoes, washable and drier also separately, to ensure foot hygiene and freshness whenever necessary.

# FEATURES

## ANTISLIP SOLE

SAFE WAY soles, both the one used for the Hi-Tech series and the one used for the Madam's Grippies, have been designed to obtain a high antislip coefficient.

The exclusive design of the new outsole, developed after specific research, has allowed to reach 60% - 70% higher performances than those provided by ENV 13278 (00) Standard. The resulting dynamic friction coefficient is:

0.26 for the Hi-Tech footwear  
0.24 for Madam's Grippies footwear

SAFE WAY soles, in the light of such results, are extremely suited to every activity seeing the simultaneous presence of: smooth surfaces (ceramics, linoleum, etc.) and water or liquids in general.

## CERTIFICATIONS AND PATENTS

SAFE WAY soles have been developed by the most innovative design and CAD techniques simulation.

The results thus achieved have proven of so great importance that SAFE WAY LLC have decided to protect the proper models by an own worldwide Certificate of Registration: EU, USA, China, etc.

## PACKAGE

Box of a sober and refined design: fruit of sensibility and attention towards our own customers' needs, who often ask for a more discrete presentation of the company logo.

If not differently specified, packages contain ten-pairs per each carton.

# LEGENDA

- Antistatic footwear
- Energy absorption of heel region
- Sole unit resistant to oils and fuels
- Breathable upper material
- Anti-slip sole
- Machine washable at 40° C
- Steel toecap resistant to 200J
- Waterproof upper
- Synthetic anti-perforation midsole

ESD footwear

All SAFE WAY shoes comply with standard EN 345/EN ISO 20345:2004 on safety footwear and EN 347/EN ISO 20347:2004 on occupational footwear for professional use and are produced of top quality materials.

In ESD (EPA) areas, in environments sensitive to electrostatic phenomena it is compulsory to use approved dissipative occupational footwear complying with European EN 61340-5-1 standards, which provides for as follows:

- when the footwear/metallic plate system is used the resistance value shall range between:

$5 \times 10^4 \text{ Ohm}$  ( $1 \times 10^5$  per scarpa) e  $1 \times 10^8 \text{ Ohm}$

- when the footwear/floor system is used as the main method for the unloading on earth, the total resistance of the combination shall be between:

$7.5 \times 10^6 \text{ Ohm}$  e  $3.5 \times 10^7 \text{ Ohm}$

Dissipative footwear, besides a conformity mark, shall also indelibly bear the logo stamped in black on a yellow background:

or

which identifies their specific characteristics.

### SLIPPER

High quality PVC

Sizes: 3 - 12

20 prs in polybag / carton

## S506 - S4

### STOPRAIN

Upper: PVC/nitrile rubber

Sole: PVC/nitrile rubber

antistatic, particularly resistant

to oils, animal fats and

moderately acid substances

Collar: synthetic material

Toecap: steel resistant to 200J

Sizes: 5 - 12

6 pairs in single  
boxes per carton

## S504 - S4

### SAFETY

Boot leg: PVC/nitrile rubber

Sole: PVC/nitrile rubber,

antistatic, particularly resistant

to oils, animal fats and

moderately acid substances

Toecap: steel resistant to 200J

Sizes: 3 - 13

6 prs in polybag / carton

## S014 - 04

### OCCUPATIONAL

Boot leg: PVC/nitrile rubber

Sole: PVC/nitrile rubber,

antistatic, particularly resistant

to oils, animal fats and

moderately acid substances

Sizes: 3 - 13

10 prs in polybag / carton

## SK01

Short white sock of cotton/elasticized polyamide

Taglie:  
S 2/5  
M 6/8  
L 9/11

## SK03

Long white sock of cotton/elasticized polyamide

Taglie:  
S 2/5  
M 6/8  
L 9/11

## S059

Anatomic insole of perforated Eva and shock absorber inserts. Shape memory heel support. Upper layer in sweat-absorbing tissue. Double antistatic seam with aluminum.

## S003

Anatomic Eva and fabric insole with antistatic stitching

## S001

Perforated antistatic insole of foam latex and woven univoven fabric

## S004

Antistatic anatomic insole of felt and fabric

### S057

Antistatic, anatomic PE insole  
Antistatic Cambrelle  
Marked ESD

### S052

PU alveolar anatomic insole  
Upper layer in antibacterial fabric  
Antistatic stitching

### S058

Alveolar anatomic EVA insole  
Upper layer in perforated split  
Antistatic stitching  
Green background

### S054

Alveolar anatomic EVA insole  
Planter support  
Soft PU shock absorber  
Upper layer in perforated split

### S055

Alveolar anatomic EVA insole  
Planter support  
Shock absorber  
Antistatic stitching  
Green background

*Professional Footwear*

*Work & Leisure*

EN/ISO 20345:2004  
EN/ISO 20347:2004  
EN 61340-5-1

Hazard Analyses Critical Control Points

Safe Way footwear complies to the regulation.

### SOLE

Polyurethan monodensity sole, excellent antislip coefficient  
coefficient of dynamic friction = 0.26

### LEGEND

- Washable in washing machine at 40°C 
- Energy absorption of heel region 
- Anti slip sole 
- Breathable upper material 
- Antistatic footwear 
- Sole unit resistant to oils and fuel 
- Synthetic toe cap resistant to 200J 
- Waterproof upper 
- Synthetic midsole 
- ESD shoe 

### LIGHTNESS

EXTRA

LIGHT

Upper in light "Texiber" of high perspiration  
vapour permeability > 2.6 mg/cm<sup>2</sup> x h

### SYNTHETIC TOE CAP

"Composite" non-magnetic toe cap,  
elastic and ultralight (weight of  
"composite" toe cap is 40% inferior to the  
steel toe cap)

### HYGIENICAL ANTIBACTERIAL LINING

PERMANENTLY antibacterial lining  
for control of bad odours

### WASHABLE IN WASHING MACHINE

Washable in washing  
machine at 40°C  
like any clothing

# X-LITE

## METALFREE

-  Antistatic footwear
-  Energy absorption of heel region
-  Sole unit resistant to oils and fuels
-  Breathable upper material
-  Anti-slip sole
-  Machine washable at 40°C
-  Steel toe cap resistant to 200J
-  Waterproof upper
-  Synthetic anti-perforation midsole

## X-LITE Styles

### X 218 - S1 Tahiti - Brown

Extrastrong Nylon fabric  
and synthetic  
breathable PU upper

sizes 2 - 12

### X 219 - S1P Odessa - Brown

Synthetic  
breathable PU upper

sizes 2 - 12

### X 416 - S3 Salina - Brown

Double fabric Aerospace  
upper  
Monodensity PU sole  
EXTRALIGHT

sizes 2 - 12

## X-LITE Styles

### X 216 - S1 Rodhos - Tortora

Extrastrong Nylon fabric  
and synthetic soft and  
breathable PU upper

sizes 2 - 12

### X 418 S1P Tremiti - Tortora

Upper of high resistance  
synthetic extrastrong suede  
Toecap resistant to 200 J

sizes 2 - 12

### X 630 - S1 Lipari - Black

Synthetic "NUBUCK"  
breathable upper  
Lining in Lycra and  
woven-unwoven fabrics

sizes 2 - 12

### X 810 - S1P Creta

Synthetic waterproof PU  
upper soft and breathable.

sizes 2 - 12

### X 730 - S1P Lipari - Black

Synthetic "NUBUCK"  
breathable upper  
Lining in Lycra and  
woven-unwoven fabrics  
Synthetic midsole

sizes 2 - 12

# X-LITE

#### Caratteristiche Generali

-PU monodensity light and flexible sole unit, antislip coefficient of 0.26 - 70% higher performances than provided by ENV 13278 (00)

-PE "alveous" and fabric insole og high perspiration: the structure permits a forced ventilation for compression and release of pump effect

-Synthetic toecap resistant to 200J , non-magnetic and elastic. in case of accidental impact, the elastic memory of the toecap material permits itself to get original shape and release of toes

-Synthetic extra-flexible midsole for a complete foot protection

**MACHINE WASHABLE**

## CERTIFICATES

*Certification of management systems for quality ISO 9001*

*Within an extremely competitive market, the certification of the company's Quality System is an indispensable referability requirement for marketing products and services. As a means for differing from non-qualified competition, it guarantees visibility to management system optimization procedures through a certification scheme based on the company's specific characteristics and kind of activity.*

*The application of ISO 9000 regulations, through the optimization of the internal management system, promotes the continuous improvement of the company's performances, thereby increasing its competitiveness on the market.*

*The Organizations whose Management System for Quality complies with the new edition of the regulations (ISO 9001:2000) ensure a higher orientation of all the functions towards the final result and more attention to the internal and external customer.*

*The quality certificate, issued by an independent third party Organization, is also a strategic commercial means capable of improving the company's image and credibility.*
